

No Detail Forgotten

A traditional backyard landscape with a lawn and small patio was transformed into a fantastic outdoor entertainment space for family, friends and visiting grandchildren. A large fireplace finished with stone veneer anchors the outdoor living area, and sits just to the side of the outdoor kitchen and bar. The dining area is covered with a custom pergola that holds eaves-mounted heaters for extra comfort.

A lap-style swimming pool with waterfall features is on axis with the interior living and dining rooms, providing a lovely view from inside the home. White painted trellises frame the perimeter of the outdoor space and are softened by climbing vines and rose bushes.

“Thanks to ample lighting, including hanging lanterns and landscape accent lighting, the outdoor space is as pretty at night as it is during the day,” says landscape architect David Thorne.
